

## **Brightcove Selects BuyDRM's KeyOS Platform To Power Microsoft PlayReady Support for Desktops and Devices**

**Leading global provider of cloud services for video to support content encryption and licensing.**

Austin, Texas — February 25th, 2014 — BuyDRM™, a leader in providing DRM technologies to pay-media operators, announced today that the company has been selected by Brightcove (NASDAQ: BCOV), a leading global provider of cloud services for video, to provide support for Microsoft PlayReady content protection across desktops and devices.

BuyDRM's KeyOS platform will enable Brightcove to deploy in-network encryption, providing seamless and scalable content security solutions for Brightcove's customers. To enable large scale license key services, Brightcove will rely on the industry-proven KeyOS platform, its mature licensing APIs, robust security, and quick deployability, as well as the KeyOS Device DRM technology.

"BuyDRM's KeyOS platform and Device DRM technologies will enable Brightcove to expand our content protection offerings on a range of devices and desktops, which is crucial as our customers look to securely publish premium content to audiences on every screen," said Jon Dahl, vice president of encoding services at Brightcove.

"We have a long history of working with the Brightcove team and their suite of products, which touches everything from transcoding to publishing" said Christopher Levy, CEO and Founder, BuyDRM. "We are truly excited to be partnered with Brightcove and we are ready to deliver a high quality service to their customers."
